## The European Union: An Introduction For Teachers

FREE four-week online course offering two CEUs begins June 26, 2013

The goal of this course is to introduce in-service teachers to the **history and the function of the EU**, and to **digital resources and methods** for student learning. By the end of the course, teachers will understand the EU as an essential part of European history, government, economics, and culture, and will be able to facilitate learning about the EU through use of technology.

The final project is a **standards-based, technology-rich** lesson plan incorporating online EU resources for each teacher's class. Lesson plans will be submitted to the UNC EUCE for possible inclusion in the online lesson plan database.
