• The European Union (EU)

• The Euro and the “euro area”

• Economic concepts and challenges

• The global economy
Why Study the European Economy?

• This is the most interesting time in the euro’s short life

• How the euro area addresses its challenges is of acute importance for the US and the global economy.

• Together the EU and the United States represent 40% of global GDP; Europe is the most important trade and investment partner of the US.

• The EU and US face many common challenges crucial to the future of the global economy.
Overview of the Euro Challenge

• Teams of 3 to 5 students
• Ninth and tenth grade global studies, European studies, world geography, economics & world history students
• One (1) team per school
• Presentation: 15 minutes

• Presentation format: your choice
• approx. 100 schools nationwide
Three-part Challenge Question
1. Describe the **current economic situation** in the “euro area” (the economic region consisting of the 18 EU member countries who have adopted the euro).
