Featuring poets Julia Kolchinsky Dasbach, Lyudmyla Khersonska, and Olga Livshin with Ana Menendez moderating this discussion.

Poetry, war, brutality... the war in Ukraine has galvanized many in Ukraine to pick up arms. Artists have picked up the brush and musicians recorded songs to express the everyday horror and pain of this war. Poets have turned to words.

This conversation among writers and scholars will inspire dialogue about how literature heals, fights, and plays a key role in this war, and all wars. Women, too, have been hit particularly hard – whether as mothers, poets, workers, wives - and some of the many themes that we will discuss include the intersections of war and gender, and war and poetry
