

This Consulate had the pleasure and privilege to take part in the 2011 edition of the Euro Challenge organized by **Miami-Florida European Union Center of Excellence**.

First of all, we would like to deeply **congratulate all students and their teachers for the dedication and the knowledge about European issues they have displayed during each presentation.**

If we needed a proof that European Union is a matter of interest around here, this is probably the best we can get.

The knowledge is indeed a very positive aspect. **The quality of the presentations, some of them very close to a professional level, was another great surprise.** We would like to congratulate the participants for this too.

As we know, it was a challenge and we had to select a few teams to **represent Florida in the final session that will take place in New York at the end of April.**

And we wish all the best to **Coral Reef Senior High School, Miami Palmetto Senior High School, and FPW Marine & Oceanographic Academy.** Finally, our great appreciation is addressed to the **Miami-Florida European Union Center of Excellence** for the good work and excellent results it obtains in building stronger ties between Europeans and Americans.
