

# Miami-Florida Jean Monnet Center of Excellence

## European and Eurasian Studies Program

### EU Jean Monnet Project

## Health and Innovation: “Nanotechnology for Medicine”

Nanomedicine: the best practices – the latest technologies and opportunities

**Wednesday, June 14, 2017 – 3:30 p.m. – 5:00 p.m.**

**University of Miami | Medical Campus**

*Sylvester Comprehensive Cancer Center -1475 N.W. 12th Avenue, Miami, FL 33136*

**Sylvester Support Services Building – Room 110**

### WORKSHOP PARTICIPANTS: BIOGRAPHICAL NOTES

#### Panelists

**Serge Braun**, PharmD, Ph.D.  
Chief Scientific Officer  
AFM-Telethon, Evry, France  
Member of the French National Academy of Pharmacy

Serge Braun, PharmD, PhD, is currently Scientific Director of AFM-Telethon, the French Muscular dystrophy Association acting in innovative therapies of rare diseases, and President of Genosafe, a CRO company dedicate to QC of biotherapeutic products.

He has 10 years of experience in the neuromuscular diseases field in the academic sector (Univ. Strasbourg France and USC Neuromuscular Center, Los Angeles) and 10 years in the biotechnology sector (Vice-President Research of Transgene SA, Gene therapy biotech company) where he developed his career in the field of gene therapy of genetic diseases and of immunotherapy of cancer.

He was co-founder of Neurofit, a contract research organization specialized in preclinical testings of both the central and the peripheral nervous system. He was Vice-President of Alsace BioValley, the tri-national initiative, non-profit making organization, for the development of a major biotech cluster in Europe.

**Tarek R. Fadel, Ph.D.**

Assistant Director, The Marble Center for Cancer Nanomedicine  
The Koch Institute for Integrative Cancer Research  
Massachusetts Institute of Technology, Cambridge MA

Dr. Tarek Fadel is the Assistant Director of the Marble Center for Cancer Nanomedicine at the MIT Koch Institute for Integrative Cancer Research. Before joining MIT, Dr. Fadel was a Staff Scientist at the National Nanotechnology Coordination Office (NNCO), the coordinating body for the U.S. National Nanotechnology Initiative (NNI). During his time at NNCO, he served as the Executive Secretary for the Nanoscale Science, Engineering, and Technology (NSET) Subcommittee of the White House's National Science and Technology Council's Committee on Technology. The NSET Subcommittee coordinates planning, budgeting, program implementation, and review of the NNI.

Dr. Fadel received his PhD from Yale University in 2011, where he continued as a post-doctoral researcher to develop nanoscale platforms for cancer immunotherapy. He previously held positions as Vice President for Research at the International Technology Research Institute, and Product and Systems Interaction Engineer at Hewlett Packard Enterprise. Dr. Fadel is lead author of several peer-reviewed publications in the fields of nanomedicine, cancer immunotherapy, and biophysics.

**Babak Kateb, M.D.**

Founding Chairman of the Board of SBMT, President of Brain Mapping Foundation, Scientific Director of SBMT and Brain Mapping Foundation, Director of National Center for Nano-Bio-Electronics, Senior Editor of SBMT-NeuroMapping & Therapeutics, Chairman of Neuroscience-20/G20 Summit Brain Mapping Initiative, Scientific Director and Chief Strategy Officer (CSO), California Neurosurgical Institute, CA, USA

Babak Kateb, MD is a neuroscientist with more than 15 years of research experience. His research has been focused on introduction of advance diagnostics and therapeutics into clinical neuroscience in order to rapidly identify and introduce game changing technologies to treat neurological disorders such as brain cancer, Alzheimer's disease, Parkinson's disease, brain and spinal disorders. Dr. Babak established Society for Brain Mapping and Therapeutics (SBMT), and currently he is the founding chairman of the board of directors & CEO Society for Brain Mapping and Therapeutics (SBMT), President and Scientific Director of the Brain Mapping Foundation and Director of National Center for Nano-Bio-Electronics; the center is focused on integration of nanotechnology, cellular therapeutics/stem cell, medical device and imaging. He was Director of Research and Development at the Department of Neurosurgery at City of Hope Cancer Center. He was a Research Scientist at Department of Neurosurgery at Cedars Sinai Medical center for near a decade where he developed partnership between Cedars-Sinai and NASA and established clinical trials using NASA technologies. He is a recipient of NASA Tech Brief Award for his pioneering work on sniffing cancer cells using NASA's electronic nose and the SBMT Pioneer in Medicine award. He is editor of the "Textbook of Nanoneuroscience and Nanoneurosurgery", published by Taylor & Francis 2013 and the editor of the textbook "Neurophotonic and Brain Mapping," which is due for a release for Dec. 2015. In 2015 he took over a new role at California Neurosurgical Institute (CNI) as Scientific Director and Director of Strategic Alliance; CNI provides neurological and neurosurgical care for 5 major hospitals (4 million residents) in LA. He has been deeply involved in global neuroscience legislation: he has chaired 3 congressional briefing on Brain Mapping and given a talk to the Canadian Parliament. His initiatives have impacted the health care delivery to the wounded soldiers in the US. He has been one of the key players in President Obama's BRAIN initiative and co-author of the G20 World Brain Mapping and Therapeutics Initiative and African Brain Mapping Initiative.

**Agarwal Ashutosh**

Assistant Professor

Pathology & Biomedical Engineering

Dr. John T. Macdonald Foundation Biomedical Nanotechnology

University of Miami Miller School of Medicine

Ashutosh Agarwal, Ph.D. is an Assistant Professor of Biomedical Engineering and Pathology and a core faculty member of the Dr. John T. Macdonald Foundation Biomedical Nanotechnology Institute at the University of Miami (BioNIUM). He is also affiliated with the Diabetes Research Institute and the Sylvester Comprehensive Cancer Center at the University of Miami Miller School of Medicine. He received his Ph.D. in Materials Science and Engineering at the University of Florida in 2009 and postdoctoral research experience at Columbia University and Harvard University. Dr. Agarwal joined the University of Miami as a faculty member in 2014 where he heads the Physiometric Microsystems Laboratory.

His research laboratory is focused on developing organ on chip platforms that mimic human organ level complexity within a fluidic microsystem capable of measuring functional readouts. The seminar will provide an overview of the design, fabrication, and testing of multiple microsystems, including 'Heart on a Chip' (funded by UM/FIU award in Nanotechnology), 'Cancer on a Chip' (funded by BioNIUM research award), 'Pancreatic Islet on a Chip' (funded by NIH), and 'Microphysiological culture systems' (funded by Coulter Foundation). Upon validation, these technologies will be applied towards testing pharmaceutical agents and therapies, driving and monitoring the differentiation and maturation of stem cells, and uncovering mechanisms of human disease. These efforts are highly interdisciplinary and benefit from the participation of students, postdoctoral scholars, and faculty collaborators in biomedical engineering and the physical and clinical sciences.

**Dr. Spana Deo**

Associate Professor, Biochemistry and Molecular Biology

Director of Graduate Studies of Biochemistry and Molecular Biology

Director of Molecular Medicine Pathway of Biochemistry and Molecular Biology

Primary Appointment of Biochemistry and Molecular Biology

University of Miami Miller School of Medicine

Associate Professor and Graduate Program Director (GPD) in the Department of Biochemistry and Molecular Biology (BMB) at University of Miami, Miller School of Medicine. Dr Deo's research interest is in the area of bionanotechnology and biosensors. Her research interest includes development of targeted delivery systems based on nanocarriers for targeted delivery, imaging, and sensing applications in biomedical field. Her group works on the development of technologies for point-of care detection of pathogens and design of novel nanobioanalytical techniques based on luminescent proteins and quantum dots for application in biomedicine. Dr. Deo is an author and co-author of over 100 scientific publications and several patents and a recipient of the NSF-CAREER Award. Dr. Deo serves on editorial boards of journals, NIH study section panels, and scientific advisory board of biotech industries. The research of her group is funded by the National Institute of General Medicine, the National Science Foundation, State of Florida, American Cancer Society, Coulter Foundation.

**Sung Jin Kim, PhD**  
Associate Professor  
Electrical and Computer Engineering  
University of Miami College of Engineering

Sung Jin Kim is an Associate Professor in the Department of Electrical and Computer Engineering and jointly appointed in the Department of Pathology. He is also an affiliated member of Biomedical Nanotechnology Institute of University of Miami (BioNIUM). He received his Ph.D. degree in Electrical Engineering from the State University of New York at Buffalo in 2008. Since he joined UM in 2010, he has contributed to building the BioNIUM cleanroom facility for nano/micro device fabrication, and this core facility plays an important role to initiate interdisciplinary collaborative researches in UM. Dr. Kim's research focuses on Nanophotonics for energy and sensing applications. He uses engineered nanostructures and novel nanomaterials for novel optoelectronic devices. Recently he invented a novel plasmonic device, Plasmon Field Effect Transistor. This transformative nanotechnology-based sensing device offers robust and highly sensitive detection for biomolecules. He is conducting a NSF-funded research for the point-of-care cancer diagnosis by collaborating other UM faculty in Pathology and Urology departments. He also developed a real-time personal air quality monitoring system for various biomedical and clinical research. He and Dr. Kumar (Public Health Sciences) awarded a NIH R01 grant to study Dry Eye syndrome with this newly developed sensing system.

**Francisco M. Raymo, Ph.D.**  
Professor of Chemistry  
Laboratory for Molecular Photonics  
Department of Chemistry  
University of Miami

Dr. Francisco M. Raymo received a Laurea in Chemistry from the University of Messina (Italy) in 1992 and a Ph.D. in Chemistry from the University of Birmingham (UK) in 1996. He was a postdoctoral associate at the University of Birmingham (UK) in 1996–1997 and at the University of California, Los Angeles in 1997–1999. He was appointed Assistant Professor of Chemistry at the University of Miami in 2000 and promoted to Associate Professor in 2004 and Full Professor in 2009. His research expertise combines the chemical synthesis of molecular, macromolecular and supramolecular constructs with the characterization of the electrochemical, photochemical and photophysical properties of the resulting materials. His current research interests are directed to the identification of operating principles to activate fluorescence, under the influence of chemical and optical stimulations, with the ultimate goals of detecting cancer cells, imaging biological samples with spatial resolution at the nanometer level and monitoring dynamic processes in real time within living organisms. He authored more than 240 publications, which have been cited approximately 14,000 times already, and his current h-index is 60.

**Alice Tomei, Ph.D**  
Assistant Professor of Biomedical Engineering  
Director, Islet Immunoengineering Laboratory  
University of Miami

Dr. Tomei's background uniquely combines expertise in bioengineering and immunology and she is applying her skills to the development of novel immunoengineering platforms to prevent rejection after islet transplantation and to promote antigen-specific tolerance for a cure of type 1 diabetes. To that end, her strategy is to design and develop novel technology platforms with strong clinical translation potential that are supported by solid mechanistic studies in preclinical models of type 1 diabetes that are relevant to the human disease. Her enthusiastic commitment to type 1 diabetes cure-focused research is matched by a solid track record of academic achievements and translational efforts. She has trained in the best engineering school in Italy, the Politecnico di Milano. She conducted her PhD work at the École Polytechnique Fédérale de Lausanne (EPFL), Switzerland, under the mentorship of Dr. Melody Swartz, world leader in lymphatic and cancer mechanobiology. She conducted her postdoctoral fellowship at EPFL in the laboratory of Dr. Jeffrey Hubbell, world leader in molecular engineering, and in collaboration with Dr. Cherie Stabler, a leader in diabetes bioengineering research. In recognition of these accomplishments, in 2012, Dr. Tomei was invited to become part of the prestigious Juvenile Diabetes Research Foundation (JDRF) encapsulation consortium, which gathers the world leaders in islet encapsulation and transplantation, and promotes collaborations, sharing of data and protocols with the overall goal of advancing the field. Dr. Tomei has presented her research work at several international conferences, including at the Key Opinion Leaders Meeting on Stem Cell Derived Beta Cells at Harvard Medical School in Boston in October 2016, at the annual meeting of the Immunology of Diabetes Society in San Francisco in January 2017, and at the annual meeting of the international society for cellular therapy (ISCT) in the workshop on special advancements in cellular therapies and regenerative medicine in digestive diseases in London, in May 2017, and at the annual meeting of the American Diabetes Association in San Diego in June 2017. Finally, she was invited to serve as member of the grant review panels for both the JDRF and for the California Institute for Regenerative Medicine (CIRM). Dr. Tomei's research has been funded by the Diabetes Research Institute Foundation, the Iacocca Family Foundation, the Juvenile Diabetes Research Foundation (JDRF), the Helmsley Trust, the Tronchetti Provera Foundation, the Children with Diabetes Foundation, the Department of Defense, and the National Institute of Health, including a recently awarded JDRF career development award. In recognition of her research productive, Dr. Tomei was recently awarded the University of Miami College of Engineering 2016 Eliahu I. Jury Early Career Research Award for obtaining major research grants. These important achievements further highlight her recognition in the field of immunoengineering for type 1 diabetes.

## **HORIZON 2020 and EURAXESS PRESENTERS**

### **Viktoria Bodnarova**

EURAXESS North America Regional Representative

Viktoria Bodnarova is the Regional Representative for EURAXESS North America, responsible for Canada and the US, as of 2013. Her main role is to inform the community of researchers of all scientific domains and nationalities based in North America about the funding and career opportunities the European Research Area

(ERA) offers (European, national or regional funding opportunities). Another important role is the management of the European Scientific Diasporas in North America initiative together with the EU Delegations and EU Member/Associated Countries.

Prior to her position in the US, she was a Project Manager and EURAXESS Network Coordinator at the Academy of Sciences of the Czech Republic. Viktoria holds a Master of Arts degree in International Relations and European Studies from the Metropolitan University in Prague. During her university studies, she participated in two exchange programs at Trent University (UK) and Concordia University (Canada).

### **Henriette Krimphoff**

Senior Scientific Officer

Unit Multilateral Cooperation & Monitoring

German Aerospace Center DLR-Project Management Agency (DLR-PT)

Henriette Krimphoff is Senior Scientific Officer in the Unit Multilateral Cooperation and Monitoring at the German Aerospace Center DLR-Project Management Agency (DLR-PT) since 2011. In 2012 she joined the unit for European and International Cooperation and is primarily responsible for giving policy advice to the German Federal Ministry of Education and Research (BMBF) for the international dimension of the European Research Area. In this function she is also part of the German delegation in the Strategic Forum for International STI Cooperation (SFIC). SFIC is an advisory body to the Council of the EU, and the European Commission. It aims to implement and drive forward a European Partnership in the field of international scientific and technological cooperation. Prior to joining DLR-PT, she has worked as an account manager in the field of expert recruitment (contracting). Ms. Krimphoff holds a Master in European Public Affairs from the University of Maastricht (Netherlands). As Senior Scientific Officer she additionally has gained experience in EU-project management in different projects (e.g. BILAT USA 2.0, ERALEARN 2020, ERAfrica, Black Sea Horizon2020).
